Short title: Polynomial solution of non-central potentials.

MR Number: 2364709

Primary classification: 81Q05

Secondary classification(s): 33C45

Review text:

One of the long series of repetitive papers re-presenting the well known solutions
of some exactly solvable ordinary differential Schroedinger equations. Another
not too difficult sophomore-level exercise in Gauss' hypergeometric functions
using the elegant change-of-variables trick found in the Nikiforov's and Uvarov's
1988 monograph on special functions.
